

1400 New Top Level Domains (TLDs)

Thomsen Trampedach Protects Your Trademark in the New TLDs

- ✓ File your trademark NOW to protect it in the new 1400 Top Level Internet Domains:

The Internet as we know it is changing dramatically!

- Today there are 22 generic top level domains like .com, .net, .org
- From September 2013 the launch of 1400 new top level domains will commence!
- Examples: .shop, .web, .paris, .london, .sport, .hotel, .bank
- Non –Latin script Top level domains will launch
- More than 25 new TLDs in Chinese Script, such as

.公司 .新闻 .网络 .商标 .深圳 and many more...!

Make sure your valuable brand gets priority filing rights in the relevant domains for your business!

What do you get ?

By obtaining registration of your trademark in new Trademark Clearinghouse (TMCH) under ICANN before September, 2013, you ensure:

- ✓ the ability to register 2nd level domains (fx: YOUR_BRAND.公司) before pirates and squatters. One filing gives access to pre-register domains in all new gTLDs.
- ✓ updates for anyone registering an infringing name in any of the new 1400 gTLDs
- ✓ use the new fast-track Uniform Rapid Suspension mechanism to stop infringers

Or risk...:

If you wait until after the new gTLDs start coming online (estimated in September) you risk that other legitimate owners of similar trademarks register before you that pirates and fraudsters purchase the domains you need for your business

Monitor for Abuse in the New gTLDs:

We deliver cost efficient monitoring software and services to detect abuse of your TM in any of the new gTLDs as well as strategy support for the most efficient use of your internet and domain name budget.

Act now and make sure to register your Trademarks as domain name in all relevant new gTLDs !

ThomsenTrampedach registers, hosts and renews your domain name in all of the new gTLDs including .公司 and .新闻.
